### BIO-ENZYME WATER TREATMENT

AQUABELLA® is a 100% natural dynamic blend of over 100 species of beneficial, non-pathogenic and naturally occurring microorganisms (non-GMO) that optimize the decomposition of water pollutants. AQUABELLA® increases biological activity and rapidly breaks down organic nutrients & dissolved solids, reducing TDS Levels and maintaining balanced pH.

AQUABELLA® replaces conventional chemical and mechanical water treatment methods with a bacterial-enzymatic complex of non-pathogenic microorganisms and their enzymes suspended in a 100% natural, non-toxic biopolymer to achieve the highest viability and maximum gene expression at time of use.

AQUABELLA® unleashes a greater biomass and biodiversity of both aerobic and anaerobic bacteria that can breakdown phosphorus, ammonia, nitrate, nitrites and other nutrients to reduce turbidity and odors and to help prevent “algal bloom.” AQUABELLA® treats both fresh water and salt water (up to 25+ ppm). AQUABELLA® is a cost-effective, easy-to-apply, organic water treatment to clarify and purify water.

| Application Directions |                  |           |               |
|------------------------|------------------|-----------|---------------|
|                        | Treatment Volume | Aquabella | Frequency     |
| Fresh Water            | 500 gallons      | 1 ounce   | Every 30 days |
| Salt Water             | 250 gallons      | 1 ounce   | Every 30 days |

**DIRECTIONS FOR USE:** Mix AQUABELLA® directly into aquarium.

**HANDLING & STORAGE:** Store at room temperature.

**VOLUME:** 32oz (946 ml)      **EXPIRATION DATE:**
